Navigation.

About Ocean Giants.

The Inman line will soon have ready and plying between New York and Great Britain a steamship which will be a very levinthan of the deep. The company has contracted with Laird Bros, of Birken head, for a vessel of steel with triple-expansion engines and twin screws. The builders have guaranteed that she shall surpass in speed anything now afloat. Her dimensions will be: Length ore all. 500 feet, beam, 62 feet; depth of hold, 43 feet; 17,500 horse power, 8,500 tons register. Thus, with the exception of the Great Eastern, this new Inman vessel for the contract of the Great Eastern, this new Inman vessel for the contract of the Great Eastern, this new Inman vessel for the contract of the Great Eastern, this new Inman vessel for the contract of the Great Eastern, this new Inman vessel and the contract of the Great Eastern, this new Inman vessel for the contract of the Great Eastern, this new Inman vessel and the property of the contract of the Great Eastern, this new Inman vessel above, as the City of Rome, which has a tonnage of 8,144, while the Etruria has soored the best record as to epsed. The introduction of twin screws will practically remove from the list of possibilities the entire breakdown of the propelling power of the vessel, either by the oss of the screw propeller or by accident to the engines. As the screws and all the machinery connected with them will be double, it hardly becomes possible that both sets should break down on one veyage. In this way passengers will be seen the set of the contract of the set of the contract of the property of the contract of the property of the contract of the property o

Marine Notes.

Marine Notes.

The prop Japan was the only veecel loaded with wheat yesterday, according to the inspector's report. She took out 23,000 bushels, 14,000 of No. 1 northern from Elevator E, and 9,000 bushels of No. 2 northern from B. All other reports concerning her wheat cargo are incorrect.

Breitung's Missing Funds.
Word has been received from Tower stating that reports are afloat regarding a deficit in the accounts of the cx-treasurer of the township of Breitung. It is said that Mayor W. H. Bassett, of Tower, said that Mayor W. H. Bassett, of Tower, whose term as treasurer of Breitung expired last March, failed to turn over his books until a few days ago, although requested frequently. When he rendered his account, Bassett was unable to explain a deficit of \$100, and also handed over \$200 of orders which he claims were paid, but which were not receipted. The board has given notice to Bassett's bondemen to appear before it tomorrow night and make good the deficiency.

and make good the deficiency.

A Presentation.

At the next meeting of the Duluth Press club, that organization will be presented with a mammoth "double grand" panel picture of Rhea, in her celebrated Queen of Holland dress. The size of the photograph, exclusive of mathematic factor of the photograph, exclusive of the work of Cormany, of this city. It is one of the most elegant pieces of photography event turned out in the country. At the base of the frame, which is one of the finest that can be obtained, is a small silver plate, bearing the name of Rhea and expressing her kindest regards to the club. The great actress left orders with Cormany to give them an elegant picture and the one he has ready for them is a marvel of taste and execution.
