

MANY WILL SEEK MORE LEARNING

Virginian Young Men and Women Soon to Scatter to Colleges and Universities.

(Range Bureau of the News Tribune.)

VIRGINIA, Aug. 28.—This city will send many young men and women to attend the various schools and colleges at the terms soon to commence. The students who go away for the first time are Gertrude Simons, who will attend Macalester college, St. Paul; Ethel Whiting, who will study domestic science at the Stout Training school at Menominee, Wis.; Halvor Olson and Milburn Carey, who take dentistry at the University of Minnesota; Victor Larson and Ward Beck, who take engineering also at the state university, and John Grande, who takes the academic course at the same school. Anna Pfaffman will go to the Winona normal, Mellicent Roskilly, Ruth McKenzie and Mamie Granholm to the Duluth normal.

Lionel Booth is taking the agricultural course at the university of South Dakota. Miss Enid Wilcox commences the junior year taking the academic course at the Minnesota university. Leighton Simons will be a senior in the law course at the university. Dan Mahoney and Gerald Roskilly are juniors in the medical course at the university and Michael Bonner is a junior in the dentistry department. Carl Hawkinson is a senior in the forestry department of the university, where Harlan Johnson is a sophomore. Harry G. Neff is at the University of Michigan, a sophomore in the law department. Samuel Cohen is also at the Michigan school taking the academic course at the University of Wisconsin. Vernon Johnson is a sophomore taking the academic course at the Wisconsin school. Axel Dahl is a sophomore in the law course at Chicago university. Edward Berg is a senior taking mining engineering at Washington university. William Hooper is at the South Dakota school of mines. Ben Wilk will be a post-senior at the engineering department of the Minnesota university. Marie Butler will attend the College of the Visitation at St. Paul and Hazen and Patrick Butler will attend St. Thomas again at St. Paul. Henry Boyle, who puts in his vacations on the range, will continue his work at the University of Michigan, studying engineering and making a specialty of construction work.
