

FISHING TUG BREAKS WAY THROUGH HARBOR ICE

The tug L. Goldish, returning from a trip to Grand Marais, broke her way into the harbor early yesterday while a crowd of person watched her slow progress through the piers. Six inches of Lake Superior ice almost prevented the little vessel from docking. The Goldish had a cargo of 31 tons of fish consigned to the Lake Superior Fish company. The vessel left again last night for Grand Marais on what probably will be the last trip of the season.
