"Kneaded by all classes"

**"Happy-Homes" Cooking
That's What We Want**

After you've heard Mrs. Brown-Lewers lecture and seen her demonstrate with the aid of Duluth Universal Flour--what is going to prevent your using the same flour and repeat some of her tricks?

She'll tell you the secret is in the flour more than in any other single item. She'll tell you, too, that with the right ingredients--flour mostly--you need never hesitate to do your own cooking.

Try it. Don't wait another day. Give hubby the surprise of his young life. When he sits down to the table tonight push a plate of your own "happy-home" rolls--Brown-Lewers style--under his nose, and watch him grin.

Duluth Universal Flour'll do it.

W. First
Street.

\$27.50
Easy Payments

D. N. T. 15-24-16

Ask Mrs. Brown-Lewers why she uses pasteurized milk whenever possible.

Probably no discovery in the line of food products in recent years is so vitally important as that of the pasteurizing of milk.

Where physicians spotted at first they now not only order it, but they demand it.

Where dairy companies laughed it to scorn at first they now spend money to perfect it.

Housewives who formerly "got along" with ordinary milk in the preparation of foods now insist on pasteurized milk.

We have a big pasteurizing plant in connection with our dairy where the latest improvements are employed in the pasteurizing of our milk supply.

Your order will have our prompt attention and be gratefully received.
