To Whom It May Concern:  
I have suffered for 2 years with Catarrhal Deafness. My condition grew worse all the time, till I could not hear very much with my left ear. Added to my deafness I suffered terribly with Head Noises which would not let up. My head was all plugged up and filled with Catarrhal mucus. After reading Dr. Kassmir's advertisement, I finally made up my mind to consult him regarding my trouble. I was much discouraged and had little hope that he could help me, but concluded to start taking treatments. I have been under the care of Dr. Kassmir less than 10 days and find my hearing just as good as ever. I can now hear a watch tick at a distance. The head noises have left me and I am a well man today. I feel that Dr. Kassmir deserves both credit and praise for my present good health. I cannot say too much for him.  
Very truly Yours,  
PETER SORMAN

## CATARRHAL AILMENTS

Nearly everyone living in this climate is afflicted more or less with catarrh of the nose or throat or both. Catarrh is dangerous! Catarrh has been known in many cases to cause death. And one of the reasons catarrh is so dangerous is because few people can convince themselves that it can—and often does—lead to serious consequences.

Catarrh works quietly and progressively. At first the victim hardly knows he is in its grasp, and the disease tightens its grip so slowly, yet so surely, that the sufferer scarcely realizes how much worse his catarrh is this year than last year—or two years ago. But all the time the poisons of catarrh are spreading over your entire system to shorten your life and destroy your hearing and your happiness.

Every sufferer of catarrh of the nose and throat may expect in time that the inflammation will extend through the Eustachian tubes to the middle ear, thus preventing the ear drum from vibrating and causing deafness. If this condition is not speedily relieved permanent deafness is almost certain to result.

If you are a sufferer of catarrhal deafness do not despair. Dr. Kassmir has made and is daily making a wonderful record in successfully treating this dangerous, disagreeable and handicapping disease—catarrhal deafness.
