

Arabians Advised to Fight Zionists Holy Land Rule

By Associated Press.

Jerusalem, April 15.—Open advice to the Arabs is being given by Palestine, the leading Jaffa Arabic daily, to copy the Egyptian example and organize real attacks so as to compel the British government to abolish the Balfour declaration making Palestine a national homeland for the Jews.

This, coupled with Lord Northcliffe's assertion, made while he was in this country, that there was bound to be an upheaval in Palestine soon, is causing great disquiet in Jewish circles.

Easter time always has been an anxious period in Palestine. Even in Turkish days, special troops had to be concentrated in the large cities to guard against disorders among the Christians and Moslems. Now that the Christians and followers of Mohammed are united against the Jews, however, the latter find themselves in grave danger. They still remember that the Jerusalem disturbance and the troubles at Jaffa took place during Easter week.

The proposed reduction of British officials serving in the Palestine administration and the subordination by Jewish officials also is helping to aggravate matters.

"Every British official removed from Palestine," asserts the Beit Ul Makdes, a Jerusalem Arabic daily, "means the tightening of the strangle hold of Zionists upon our government. We must resist such a move with force even with the last drop of Arab blood."
