

## **Small Boats Fast in Ice.** (Plain Dealer Special)

**DULUTH, April 26.**—The light north-east wind which has been blowing at this end of the lake has packed the ice together so that small boats are having trouble working through. The steamer Hazel and the gas boat Goldfish and the steamer America of the Booth line have been stuck in the ice about four miles out since last night and unless the wind goes down it looks as if help will be needed before they can make the harbor.
