DISTRIBUTION AMONG STRIKERS.

EACH MAN WILL RECEIVE PROX \$4 TO SS FOR EACH WEEK.

THE COMPANY WAS SUCCEEDED IN STARTING THE OLD S-INCH MILLA

MORE CHANGES IN THE PLAN OF WORKING ON THE ROLLS.

The strikers at Bay View are receiving their strike benefits today. They held a meeting this morning at which the work of apportioning the funds at hand was begun by figuring out the amount due each, and a meeting is being held this afternoon, when the checks will in all probability, be issued. The amount distributed will be about \$2,500.

distributed will be about \$2,500,

One of the men said that from \$4 to \$8 would be paid each man, for each week that they were out. It would, he said, depend on the financial circumstances of the applicant, how much he would get. About 100 men expect to be notified that they are entitled to some of the funds, and averaging the amount due each as \$6 a week, they would get \$24 apiece for the four weeks that they were on strike.

Simily toward the last becoming quite sharp.

After the sister's petition had been filed, Mr. Bremer filed an inventory and from this it appeared that he had retained some \$19,000, which he claimed was owing him by his mother as a result of a partnership that existed between them of a real estate and brokers ted by the other heirs and is being inquired into. It is also charged that Mr. Bremer was careless in keeping his accounts and that the accounts of the eswere on strike.
One More Will Starts.

The old 9 inch mill is now in operation at the local plant of the Illinois Steel company, but the company has been unable to start the 8-inch mill for lack of experienced help. It is said that this mill cannot be put in operation Friday, either, and that it may not be started before next week. None of the day or "boss" rollers on these two mills have been invited to come back to work, and the change of the plan of operation made by the company is believed to be the forerunner of the introduction of the same system in other parts of the country. This does away with the so-called "boss" roller altogether, and each man in the three turns of operation will be personally responsible for the train herms, instead of one man being responsible for all of them. The head roller received about three times the wages of his two assistants heretofore. Hereafter all will be classed as assistants. all will be classed as assistants
