

DULUTH HIGH SCHOOL STUDENT BUILDS A SPEEDY MOTOR BOAT

THE "HOME-MADE" BOAT IN ACTION.

The above is a reproduction of a motor boat built by Nathan Cook, a student at the Duluth Central High school. The boat was completed this summer by Mr. Cook in the manual training rooms of the high school.

Both in point of its appearance and its ability to give adequate service the craft has been pronounced 'ideal' by old ship carpenters. The youthful boat builder is planning to make a larger vessel next year.
